

Download Addition Of Fractions With Unlike Denominators

How to Add Fractions With Unlike Denominators - Working with Improper Fractions Find the least common multiple (LCM) for the denominators. Multiply the numerator and denominator to get like denominators. Turn the other fractions into equivalent fractions. Add the numerators but leave the ...Lessons / Fractions / Adding and Subtracting Fractions With Different Denominators. Adding and Subtracting Fractions With Different Denominators. Page 1 of 3. This is a bit tricky, but you'll think it's easy once you get used to it! Let's try this: To add fractions with unlike denominators, rename the fractions with a common denominator. Then add and simplify. For example, suppose you want to add: $\frac{1}{11} + \frac{2}{3}$. The LCM of 3 and 11 is 33. So, we need to find fractions equivalent to $\frac{1}{11}$ and $\frac{2}{3}$ which have 33 in the denominator. Calculator Use. Add and subtract proper and improper fractions with this calculator and see the work involved in the solution. Select the number of fractions in your equation and then input numerators and denominators in the available fields. Click the Calculate button to solve the equation and show the work., Addition Of Fractions With Unlike Denominators.
