

Download Center Of Dilation Not Origin

These worksheets highlight the topic dilation - center not at the origin. A dilation is a transformation in which an image stretches or shrinks based on the scale factor. A set of worksheets illustrates the concept of dilation with skills like writing the coordinate rule, finding the new coordinates, drawing new shapes, finding the original coordinates, and more are included. Dilations with Center other than the Origin. A dilation with any point other than the origin as the center of dilation can be accomplished by first translating the center of dilation and figure so the origin becomes the center, and then translating back: Example 7: Find a coordinate rule for the dilation with center $(5, -3)$ and scale factor 2., Center Of Dilation Not Origin.
