

Download Different Types Of Parallelograms

Three Special Types of Parallelograms. Parallelograms are a specific type of quadrilateral – which is a four-sided shape – but what distinguishes parallelograms from other quadrilaterals is that both pairs of opposite sides of a parallelogram are parallel. Additionally, some parallelograms are special -- rhombuses,...Types of parallelograms 1. Parallelograms Quadrilateral with 2 pairs of parallel sides. 2. 4 types of Parallelograms ? 1. Rectangle ? 2. Rhomboid ? 3. Square ? 4. Rhombus. 3. Rectangle ? A parallelogram with 4 right angles. ? Two pairs of parallel sides. 4. Rhomboid ? Two pairs of parallel sides. ...Types of parallelogram: A square is a special type of parallelogram. All sides are equal in length. Each angle in a square is 90 degrees. Diagonals of square bisect each other at right angles. The area of square is square of side. Opposite sides are equal in length. Each angle in a rectangle is 90 degrees. There are three special types of parallelogram, they are: Rectangle. Rhombus. Square., Different Types Of Parallelograms.
