

# Download Divisible By 10

Divisible by 10 is discussed below. A number is divisible by 10 if it has zero (0) in its units place. Consider the following numbers which are divisible by 10, using the test of divisibility by 10: 110, 200, 360, 490, 1190, 1510 here all these number is divisible by 10 because their units place is 0. What is 10 divisible by? In others words, what can you divide 10 with and get a whole number? To be more specific, by which integers can you divide 10 and get another integer? Below, we list what numbers can be divided by 10 and what the answer will be for each number.  $10 / 1 = 10$   $10 / 2 = 5$  Divisibility by 10: How to check a number is divisible by 10? It is very simple, check for the units digit of the number, if it is 0, then the number is clearly divisible by 10. Examples: Is the number 1234567890 divisible by 10? Check for the unit digit, it is 0,  $5 + 7 + 2 + 2 + 5 + 8 + 3 + 4 = 36$  So 1234567890 is divisible by 10. 10 is divisible by 2 because it goes into 10 5 times. Also 10 is divisible by 5, 5 goes into 10 2 times. Ten is divisible by any real number other than zero., Divisible By 10.
