

Download Easy Line Graph

Enter your data. A line graph requires two axes in order to function. Enter your data into two columns. For ease of use, set your X-axis data (time) in the left column and your recorded observations in the right column. In Microsoft Excel, adding a line graph to a sheet or workbook creates a visual representation of the data. In some instances, that picture of the data could reveal trends and changes that might otherwise go unnoticed when the data is buried in rows and columns. Lost a graph? Click here to email you a list of your saved graphs. TIP: If you add kidszone@ed.gov to your contacts/address book, graphs that you send yourself through this system will not be blocked or filtered. Note: You can make charts using the table feature of many word processing programs. How to Make a Graph And now we'll learn how to make a graph. In science, graphs normally show comparisons of two or more things. Two types of graphs that are often used in science fair projects are bar graphs and line graphs., Easy Line Graph.
