

Download Exterior Angle Theorem Formula

Triangle Calculator. Please provide 3 values including at least one side to the following 6 fields, and click the "Calculate" button. When radians are selected as the angle unit, it can take values such as $\pi/2$, $\pi/4$, etc. Euler's formula: Euler's formula, Either of two important mathematical theorems of Leonhard Euler. The first is a topological invariance (see topology) relating the number of faces, vertices, and edges of any polyhedron. It is written $F + V = E + 2$, where F is the number of faces, V the number of vertices, and E, Exterior Angle Theorem Formula.
