

# Download How To Solve Inequalities With 2 Signs

Solve:  $x \geq 2 < 75$  First, let us clear out the  $\frac{1}{2}$  by multiplying both sides by 2. Because we are multiplying by a positive number, the inequalities will not change. A double inequality is an inequality where there are two signs, as opposed to one. Ex: an inequality could be  $3x < 15$  A double inequality could be  $3x < 15 < x + 20$  If you'd want to solve that ..., How To Solve Inequalities With 2 Signs.
