

# Download Product Moment Coefficient

Product Moment Correlation Coefficient #1 In this M4thsVideo we introduce Pearson product-moment correlation coefficient (PPMCC/PMCC) .The correlation coefficient is also known as the product-moment coefficient of correlation or Pearson's correlation. The correlation coefficients for linear fits to increasingly noisy data are shown above.In statistics, the Pearson correlation coefficient (PCC, pronounced / ˈp ɪ r s n /), also referred to as Pearson's r, the Pearson product-moment correlation coefficient (PPMCC) or the bivariate correlation, is a measure of the linear correlation between two variables X and Y.According to the Cauchy–Schwarz inequality it has a value between +1 and -1, where 1 is total positive linear ...This is a whole lesson looking at correlation between variables and how to quantify this, by using the PMCC to do so. The lesson includes some fantastic examples and lots of detailed teaching slides, to help ALL pupils understand a tricky subject. 22 s..., Product Moment Coefficient.
