

# Download Punnett Square Practice

Punnett Square Practice quiz. Choose your answers carefully after you have run the square. READ each question twice to make sure you are answering what it asks! Each genotype shown in the Punnett Square has a 25% chance of occurring. If the same genotype appears in more than one square, the probabilities are added: 1 square = 25% probability. 2 squares = 50% probability. 3 squares = 75% probability. If the same genotype appears in all 4 boxes, 100% of the offspring will have that genotype. Monohybrid Punnett squares. Khan Academy is a 501(c)(3) nonprofit organization. Donate or volunteer today! Punnett Square Practice Worksheet 1) For each of the genotypes (AA, Aa or aa) below determine what the phenotype would be. Purple flowers are dominant to white flowers., Punnett Square Practice .
