The Pythagorean Theorem or Pythagoras' Theorem is a formula relating the lengths of the three sides of a right triangle. If we take the length of the hypotenuse to be  $c$  and the length of the legs to be  $a$  and  $b$  then this theorem tells us that:  $c^2 = a^2 + b^2$ . Pythagorean Theorem states that Determine the missing length in each right triangle using the Pythagorean theorem. Round the answer to the nearest tenth.
