According to Pythagorean Theorem, the sum of the squares on the right-angled triangle's two smaller sides is equal to the side opposite to the right angle triangle (the square on hypotenuse). Using a Pythagorean Theorem worksheet is a good way to prove the aforementioned equation. The Pythagorean Theorem relates to the three sides of a right triangle. It states that $c^2 = a^2 + b^2$, C is the side that is opposite the right angle which is referred to as the hypotenuse. A and b are the sides that are adjacent to the right angle.
