

Download Radical 12 Simplified

Similar to Chinese Pinyin Table, the Chinese Radical Table - Simplified lists all the radicals for the simplified Chinese characters. There are 214 radicals in the original Kangxi radical list, but a few of them are no longer used in the simplified Chinese. The list of Chinese radicals is a rough equivalent of a Chinese alphabet. A Chinese radical (Chinese: 部; pinyin: bù; literally: 'section header') is a graphical component of a Chinese character under which the character is traditionally listed in a Chinese dictionary. This component is often a semantic indicator (that is, an indicator of the meaning of the character), though in some cases the original semantic connection has become obscure, owing to ...The Kangxi dictionary lists a total of 47,035 characters divided among the 214 radicals, for an average of 220 characters per radical, but distribution is unequal, the median number of characters per radical being 64, with a maximum number of 1,902 characters (for radical 140 冫) and a minimum number of five (radical 138 冫). The radicals have between one and seventeen strokes, the median ...We can use the product rule of radicals (found below) in reverse to help us simplify the n th root of a number that we cannot take the n th root of as is, but has a factor that we can take the n th root of. If there is such a factor, we write the radicand as the product of that factor times the appropriate number and proceed., Radical 12 Simplified.
