From traffic cones and spherical globes, to cans and dices 3D shapes are everywhere. Develop real-world connections with this stock of printable worksheets on 3D shapes in real-life. Examples and everyday objects help children of kindergarten, grade 1, and grade 2 to connect and comprehend the concept effortlessly. We're just getting started with 3D shapes for Jaida, my first grader, so this is a fun set to introduce her to 6 of the solids: cone, rectangular prism, triangular prism, sphere, cube and cylinder. I love the mix of the picture representations and the 'real life' pictures. It really helps kids to see that shapes are all around them. 3D shapes consist of faces, edges and vertices. Faces are the flat sides that come together to form the shape, edges are the connecting lines between faces and vertices is the technical term for corners. Therefore, a cube has 6 faces, 8 edges and 8 vertices. Mixed Maths Addition/Subtraction, Inverse, Shapes, Money, Counting On, Sorting, Place Value AND MORE BUNDLE.
