

# Download Textual Data Definition

Unstructured data (or unstructured information) is information that either does not have a pre-defined data model or is not organized in a pre-defined manner. Unstructured information is typically text-heavy, but may contain data such as dates, numbers, and facts as well. This results in irregularities and ambiguities that make it difficult to understand using traditional programs as compared ... Binary search tree. First of all, binary search tree (BST) is a dynamic data structure, which means, that its size is only limited by amount of free memory in the operating system and number of elements may vary during the program run. Textual criticism is a branch of textual scholarship, philology, and literary criticism that is concerned with the identification of textual variants in either manuscripts or printed books. Scribes can make alterations when copying manuscripts by hand. Given a manuscript copy, several or many copies, but not the original document, the textual critic might seek to reconstruct the original text ... By the end of this lesson, you will know the definition of subjective data in nursing, the difference between subjective and objective data, and..., Textual Data Definition.
