

Download Traditional Multiplication Method

How To Do Long Multiplication Arrange your numbers with the larger number on top and the smaller number on bottom. Starting with the ones digit of the bottom number, multiply it by the last digit in the top number. Write the answer below the equals line. If that answer is greater than nine, write ...U.S. Traditional Multiplication (Standard) U.S. traditional multiplication (standard) is familiar to most adults and many children. A person using this algorithm multiplies from right to left, regrouping as necessary. The traditional method for teaching this algorithm is to begin with models Long Multiplication. Long Multiplication is a special method for multiplying larger numbers. It is a way to multiply numbers larger than 10 that only needs your knowledge of the ten times Multiplication Table. Let us say we want to multiply. 612×24 . First we multiply 612×4 ($=2,448$), then we multiply 612×20 ($=12,240$), This is a very easy method, (easier than Partial Products!), Traditional Multiplication Method.
