

Download What Is The Lcm Of 8 10 And 12

The least common multiple of 8 10 and 12 is 120. It is not possible to give a sensible answer to this question. The least common multiple (LCM) refers to a multiple that is COMMON to two or more ...The least common multiple (LCM) of a set of numbers is the lowest positive number that is a multiple of every number in that set. Suppose you want to find the Least Common Multiple (LCM) for 6 and 8, notation LCM(6,8): The LCM of 6 and 8 is 24 because 24 is the smallest number that is both a multiple of 6 and a multiple of 8. The least common multiple (LCM) of a set of numbers is the lowest positive number that is a multiple of every number in that set. Suppose you want to find the Least Common Multiple (LCM) for 6 and 8, notation LCM(6,8): The LCM of 6 and 8 is 24 because 24 is the smallest number that is both a multiple of 6 and a multiple of 8. The lcm of 10 and 12 is 60. Steps to find LCM. Find the prime factorization of 10 $10 = 2 \times 5$; Find the prime factorization of 12 $12 = 2 \times 2 \times 3$; Multiply each factor the greater number of times it occurs in steps i) or ii) above to find the lcm: $LCM = 2 \times 2 \times 3 \times 5$; $LCM = 60$, What Is The Lcm Of 8 10 And 12.
